

BtL Moving Office – SIP Solution

SIP Solution

Your telephone lines and internet access are the two most important aspects of your company's infrastructure. When moving office, the potential for service delays are high but BtL is ready to lend a hand.

Dealing directly with BT and other service providers can be frustrating and will prove costly if things go wrong. So why not let our office move consultants manage every aspect of your relocation from category 5 cabling and telephone line provision to the physical relocation re-commissioning of your server.

BtL will take ownership of the project and will make sure everything runs as smoothly as possible.

**Can't take your old number with you due to geography?
We have a permanent solution...**

Port both the main number and all DDI's from the old ISDN lines to BtL SIP Trunks and permanently divert to one single number on the new ISDN lines until clients are re-educated with new numbers.

Pricing

Service	Pricing
Setup Cost for SIP Trunk	£85
Monthly Rental for SIP Trunk	£4.95
