

Snow Bound Home Working Solutions

Roads Closed, Flights Cancelled, Trains Delayed? ... Important Meetings??

The Federation of Small Businesses (FSB) has estimated that 6.4million of the UK's working population did not make it into work during snow days. The FSB has also been estimated that heavy snowfall could cost UK businesses about £1 billion!

If your company's has ever been affected by the snow, now is your time to turn to Snow Bound Conferencing and Cloud Computing from BtL Communication, the only Disaster Recovery and back-up solution your company needs. Our free audio and video conferencing quote can help your business save money especially when the snow falls!

BtL's Conferencing solutions have been designed to help UK businesses stay in face-to-face contact with colleagues, suppliers, partners or clients when disasters such as adverse weather conditions or transport strikes hinder business travel. Disruption caused by the heavy snowfall in 2009 cost UK businesses – **so don't get left in the cold!**

BtL's Virtual Office or Cloud Computing allows you to logon to your corporate system from any computer connected to the internet, anytime and from anywhere in the world.

Companies of all sizes are using the cloud to boost their business. Some of them are using it to enable remote working, while others employ it to cut costs. Some entrepreneurs are choosing the cloud to create entirely new kinds of businesses.

So when the snow falls your business can run as normal even if your employees are stuck at home!

The Facts

- 62% of UK workers would be happier and more productive working from home
- 75% of UK office workers are in jobs that offer no flexibility in where they carry out their work
- 12% of the working population regularly or permanently work from home increasing by just a fifth over the last ten years
- Only 22% of the UK workers surveyed would choose to work in a traditional office
- 55% of employers said their employees were negatively affected by the daily commute to work.
