**Dropbox Business helps your company grow without limits, while you keep complete control of important company information and user activity.**

## Get all the features your business needs

### Flexible storage plans

Choose the right plan to ensure your team has the space it needs to be productive.

### Link permissions

Password protect your links or set expiry dates to grant temporary access.

### Admin dashboard

Monitor team activity, view connected devices and audit sharing activity.

### Remote wipe

Clear files from lost or stolen devices to keep company files in the right hands.

### File and version recovery

Easily recover deleted files and restore previous file versions.

### Dropbox Paper

A simple, powerful way to create, share and keep your team in sync – with the added benefit of admin controls.

### Account transfer tool

Transfer files easily from one user to another when responsibilities change.

### Third-party app integrations

Extend the power of Dropbox with over 300,000 connected apps.

### Team folder manager

Get visibility and control of team folders, including sync management.

### Smart Sync

Access every file in their Dropbox, directly from their desktop, using very little hard disk space.

### Groups

Create groups to manage team member access to specific folders easily.

### Live support

Get answers to your questions quickly via priority phone, email and chat support.

## Keep your team productive and your data safe

### File backup

Get the storage your business needs to share and collaborate seamlessly.

### Easy sharing

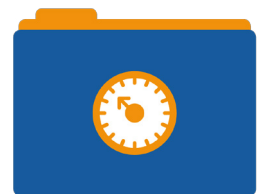

Stay productive with new ways to easily share work and collect feedback.

### Administrative tools

Team management stays simple from a central location, the admin console.

### Security features

Protect sensitive company files with enterprise-grade security features.
